## **NATIONAL SEMINAR**

**Sustainable Development of  
the Agri food Industry:  
Promoting Industrial  
Innovation and Foundation of  
Food Safety**

**June 07<sup>th</sup>, 2026 Mostaganem-ALGERIA**

## **SEMINAR CONTEXT**

Food safety in the industry aims to guarantee that food placed on the market poses no danger to health and the consumer. It concerns the entire production chain, from raw materials to the finished product. Key measures serve to protect consumers, increase market confidence, and reduce losses and health risks, in accordance with regulations.

Addressing these issues requires sustainable agricultural practices by reduction of losses through recycling (recovery of industrial waste), water management (origin and treatment before transformation processes, fate and treatment of industrial effluents), quality management challenges and issues (HACCP, traceability, ....), and to promote industrialization through aid projects, start-up projects and artificial intelligence.

## **TOPICS**

1. Technological and Industrial Innovation in Agri-Food Systems
2. Food Safety systems
3. Functional Foods & Bioactive Compounds
4. Artificial Intelligence and new technologies in Agri-Food productions

## **SEMINAR AIMS**

- a. Strengthen Scientific and Technical Exchange from a Quality and Safety Perspective To enhance knowledge-sharing and scientific dialogue among experts in water management, sustainable production, and food biotechnology, while emphasizing the integration of ISO-based management systems that ensure efficiency, traceability, and risk control across agri-food value chains.
- b. Demonstrate the Practical Implementation of ISO Standards in the Agri-Food Sector To present successful applications of ISO 9001 (Quality Management), ISO 22000 (Food Safety Management), HACCP, and systems for food defense and food fraud prevention, highlighting their role in strengthening sustainability, consumer protection, and credibility within agri-food industries—particularly relevant to the Algerian context.
- c. Promote Innovation and Entrepreneurship Aligned with International Quality Requirements To showcase innovative agri-food start-ups and breakthrough technologies especially those integrating sustainability, circular economy practices, traceability tools, artificial intelligence, and ISO-compliant quality systems. To support economic growth and competitiveness Increase value addition, improve market access, and strengthen the competitiveness of agri-food industries in local and global markets
- d. Enhance Collaboration for Sustainable, Safe, and High-Quality Food Systems
